LookHear
AtlasIED

AtlasIED and Synect invite air travelers around the world to experience LookHear, as the company unveils the first visual digital signage display to tap into Atlas IED's GLOBALCOM enterprise-wide communications system. GLOBALCOM manages audio announcements and messages at 85 percent of airports in the United States, as well as in major cities around the world, and the new LookHear solution integrates visual content from Synect for multisensory airport communication. LookHear offers airport branding, messaging and swift, efficient deployment of urgent communications in a sleek, custom-designed digital signage endpoint.

Xtreme High Bright Outdoor Displays
Peerless-AV
The COVID-19 pandemic created a need to share important, possibly even life-saving, information more quickly and effectively than ever before. With digital displays, airports can quickly provide updates on ever-changing COVID-19 protocols. Are masks are required? That's one example of a question that should be answered before a passenger enters the airport, and answers to questions like these can be shared on outdoor digital displays such as the Peerless-AV Xtreme High Bright Outdoor Displays.
